

TVRGB916A01 RGB Multi Light Controller

The TVRGB916A01 is a 24V Red, Green and Blue LED light controller. It has eight pre-programmed colours and the option of over 1000 colour variations. This unit can be programmed to display a cycle of light colours with any combination of colour, light intensity, frequency and rotation (up to 28 seconds). The TVRGB916A01 has three manual input push buttons and three outputs each capable of controlling six RGB LED lights. The TVTXC916A07 wireless wall transmitter and the TVTXQ916A07/42 remote control are recommended for use with the TVRGB916A01.

The RGB LED lighting trend started in Europe and is used to create stunning effects in restaurants, bars, night clubs and cafes. The TVRGB916A01 can offer a low cost and energy efficient way to add atmospheric lighting features and effects both indoors and out.

Create garden highlights by lighting pools, water features, walls, paths, gates, tress and garden beds. Indoors, create atmosphere and mood lighting in a home theatre room, bar room or a feature bathroom or bedroom. Create a dynamic indoor feature wall or a funky party atmosphere at you next BBQ.

TVRGB916A01 RGB Controller
