

TVL3

series

Product Segments

- **Comfort Motion**
- **Ergo Motion**

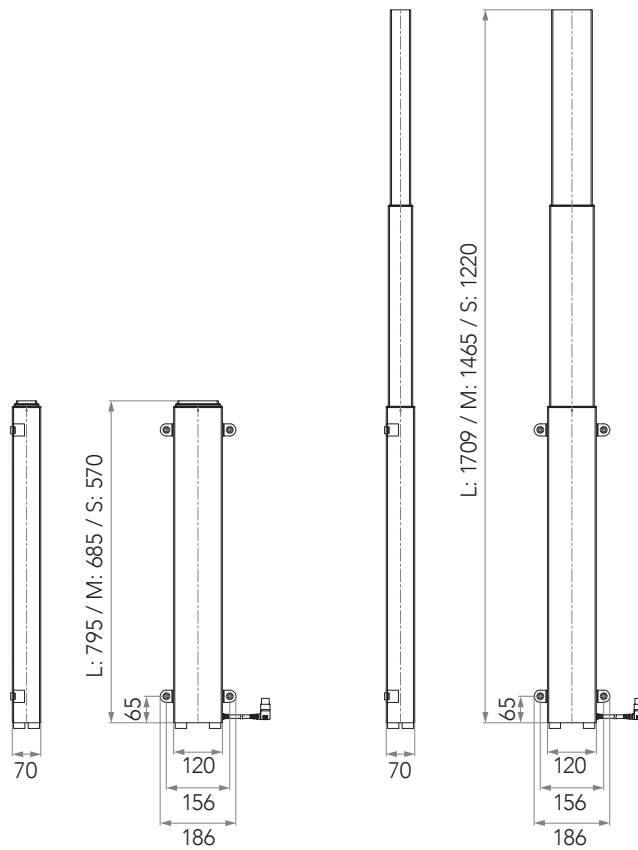

The TecHome TVL3 series columns are primarily designed as TV lifts, but can be used in other applications that require vertical movement using a remote control. Our steel constructed TVL3 is available in three sizes depending on the requirements of the application. An extended height position can be programmed using our remote control.

General Features

Maximum load	600N
Maximum speed at full load	22.0mm/s (with 600N in a push condition)
Minimum installation dimension	570mm
Dimension of outer tube (L*W)	120*70mm
Certificate	RoHS
Adjustable stroke (preset in factory)	
Adjustable mounting bracket
