

TH495 Rain Sensor

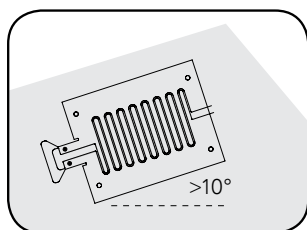

Installation Sheet

This rain sensor only works with a dedicated opening roof controller manufactured by Techome supplied by your dealer. The TH495 rain sensor operates on the conductivity of the rain (water) bridging the blades of the rain sensor.

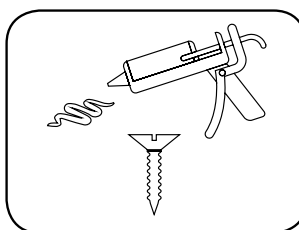

What you need

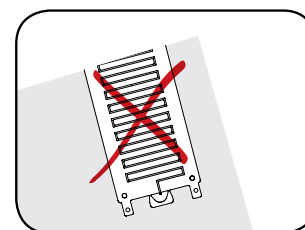

How to install

Flat or slightly sloped area.

Secure with silicon or screws.

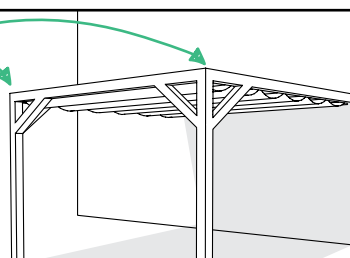

DO NOT twist or bend.

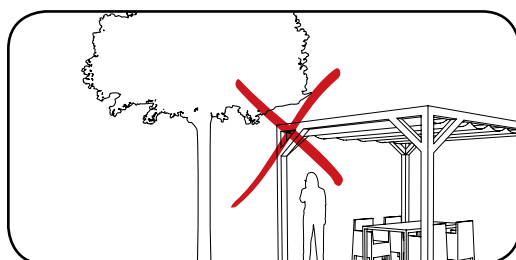

Where to install

INSTALL rain sensor away from house in the corner of the opening roof.

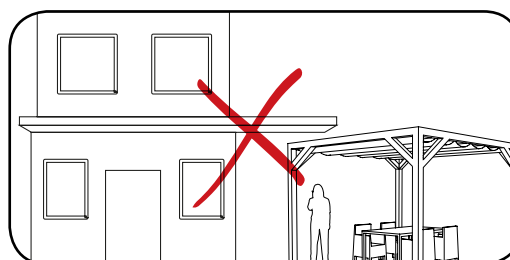

Rain sensor needs to be installed in an open area.

Caution

DO NOT install under trees or branches.

DO NOT install under roof lines or eaves.

Test

TOUCH rain sensor with finger and opening roof will close.
